

Matt Sanmiano

AI Specialist | Automation Engineer | Content Strategist
mattsanmiano@gmail.com | Canada

PROFESSIONAL SUMMARY

Hands-on AI Specialist with practical experience designing, building, and deploying intelligent automation systems. Combines deep knowledge of large language model tooling (Anthropic Claude, prompt engineering, agentic workflows) with end-to-end automation engineering using n8n, MCP integrations, and multi-agent architectures. Proven ability to translate complex AI capabilities into real-world productivity systems. Currently operating a personal AI Operating System (AIOS) that manages content, scheduling, and decision-making pipelines for a growing digital brand serving African men 35+.

CORE SKILLS

AI & LLMs: Anthropic Claude API · Prompt Engineering · Agentic Workflows · Multi-agent Orchestration · Retrieval-Augmented Generation (RAG)

Automation & Integration: n8n · MCP (Model Context Protocol) · REST API Integration · Webhook Design · OAuth Flows

Tools & Platforms: Claude Code · Notion · Google Workspace · Canva · Gamma · Calendly · Meta Graph API (in progress)

Content & Strategy: AI-assisted Content Systems · Multi-platform Publishing · Social Media Strategy (Instagram, LinkedIn, Facebook)

Emerging: Vibe Coding · Personal AI Agent Design · AI Audit Frameworks

KEY PROJECTS & AI WORK

Personal AI Operating System (AIOS) | 2025 - Present

- Designed and deployed a fully operational personal AIOS integrating 10+ tools via MCP OAuth (Gmail, Google Calendar, Google Drive, Canva, Notion, Gamma, Calendly).
- Built a multi-agent content pipeline that converts a single topic into three platform-ready outputs (Instagram Reel script, Facebook post, Substack article) in one prompt cycle.
- Automated a Sunday content batch workflow — 52 hours/year reclaimed in content planning.
- Implemented a structured decision log, audit framework (73/100 score), and memory system for persistent AI context across sessions.
- Integrated n8n cloud automation with Claude Code via .mcp.json, enabling triggered AI workflows from external events.

Strongafter35afrimen — Content Brand & Community | 2025 - Present

- Founded and operate a content brand targeting African men 35+ across Instagram, Facebook, LinkedIn, and Substack.
- Built AI-powered content templates (ideation, caption writing, repurposing) reducing content creation time by ~60%.
- Developing Meta Graph API integration for programmatic publishing — removing manual posting entirely.
- Applying community-first messaging frameworks and culturally relevant health/AI content to drive follower growth.

CERTIFICATIONS

- AI Masterclass — Tedprime Limited, 2025
